The fine art of fine dosing

## Linear powdering machines Fine dosing FD- MVH

Fine dosing powdering machines are designed to master sprinkling of powders and granulate, to ensure a constant material throughput with good distribution profile on the width of the machine.

As no two applications are the same, MCPI offers for every powdering machine a large flexibility:

- Throughput flow with adjustment in a ratio of 1 to 100 (with motor rpm and outlet section of extractor).
- Capacity to operate with any kind of materials with almost no segregation of particles.
- Mass flow regulation can be offered as an option.

## The fine art of fine dosing

### Technical data :

Throughput flow stability	< 5%
Max width	Up to 2000 mm
Range of throughput flow	Adjustable in a ratio of 1 to100
No particle size segregation	Particle size distribution is respected.
Operation mode	Continuous or batch

**Powdering machine, width 1000 mm.**
