Single-shaft lump crusher with a sieve for crushing lumps, clots and crusts in bulk solids

Advantages:
• Low installation cost
• Less installation height
• Sturdy design
• Simple assembly
• Low noise
• Accurately definable particle size
• Suitable for explosion-hazardous products
Characteristics:
Sizes: 200x300, 300x400, 400x600 mm or as per customer's specifications
1) Sturdy and welded housing
2) Shaft feedthrough with packing gland or with special shaft sealing rings for pressure-tight sealing
3) External bearing
4) Direct drive with a slip-on geared motor
5) Horizontal beam beater
6) Sieve holder with a semi-circular moulded sieve, replaceable, with round, square or rubbing holes
